Trip Report

Navigation 101 At Comox Lake (other) [return to Reports list](#)

Sun Jun 07, 2015

Leader: **William Wright**

Co-Leader:

After a gruelling morning of mental jumping jacks, especially for the leader, the participants felt ready to embark on stage 2 - a live compass targeting exercise at Comox Lake!

After a picnic lunch by the river shore, we travelled a click or so, to the lake shore, where summer temps and further navigational tasks were experienced.

All survived with faculties intact and no medical response was required although several weary souls appeared to have had their matter taxed - on the upside, we've a few more club members who will now have skills to navigate from disorientation.

Thanks to all for your challenging queries that surely help keep an old man young - a subject is known when taught!

Nav Newbies.
